Individual Assignment #1 – Week 4 International

Logistics & Trade

Student: Alexandre FERRARI

Commodity: Modular Anti-Theft Travel Backpack

Manufacturing Country: China

Destination Market: European Union (France)

1. Commodity / Parts Database

Modular Anti-Theft Travel Backpack

This item is a modular anti-theft travel backpack that can use for a repeated personal in city use and travel. The primary zipper opening of the bag is on the back-facing side, causing less chance of theft in crowded public places. This features removable and adaptable internal compartments which allow the user to help organize clothing, personal effects, and travel accessories. The primary fabric of the backpack is synthetic textile, which is abrasion resistant and water repellent. To transfer weight, the adjustable padded shoulder straps are used in conjunction with stress points designed with reinforced stitching. They are worn on the back. The product has no electronic parts and it is designed for use at home, office and travel.

Material Composition (Estimated from Comparable Retail Products):

Polyester / Nylon textile fabric: 70%
EVA foam padding: 15%
Plastic components (buckles, clips): 10%
Metal components (zippers, sliders): 5%

Country of Origin :

Country of production and final assembly: China
Manufacturing region: Guangdong Province (Shenzhen / Guangzhou area)

Weight :
Net weight (empty backpack): approximately 0.9 kg

Gross weight (including retail packaging): approximately 1.1 kg

Product Dimensions (Approximate) :

Height: 48 cm
Width: 32 cm
Depth: 18 cm

Packaging Type :

Individual polybag
Single-wall retail carton
Product packed in compressed (flattened) form to optimize shipping volume

Import Valuation :

Factory unit price: €18.00
No royalties, assists, or licensing fees included

Region Where Product Is Sold :

European Union (France, distribution via regional distribution center)

Restricted or Regulated Components:

None (The product does not contain leather, animal products, batteries, electronics, or hazardous materials.)

2. US HTS Classification – Reasoned Attempt

Classification Methodology :

The product was classified following the General Rules of Interpretation (GRI) of the Harmonized System.

Reasoning :

The item is a container designed to carry personal effects
It is worn on the back using shoulder straps

It is not apparel, furniture, or electronic equipment

The essential character of the product is the backpack itself, not its accessories
The product falls under HS Chapter 42, which covers travel goods, handbags, and similar containers.

Proposed US HTS Classification :

HTS 4202.92
Travel, sports and similar bags, with outer surface of textile materials

3. EU TARIC Classification – Reasoned Attempt

Reasoning :

The product serves the same primary function as identified in the US HTS analysis
The EU TARIC system follows the HS nomenclature at the 6 digit level
The outer surface of the backpack is made of textile materials
The product is designed for repeated personal use to transport personal belongings

Proposed EU TARIC Classification :
TARIC 4202 92

BTI Reference	DEBTI18789/24-1
Issuing country	DE
Start date of validity	17/06/2024
End date of validity	16/06/2027
Nomenclature code	42029291**********

Travel goods and similar containers, with outer surface of textile materials

4. Classification Justification Summary :

The classification is supported by the following factors commonly considered by customs authorities:
Primary function: carrying and organizing personal effects
Essential character: the backpack structure itself
Material dominance: textile outer surface
Use case: travel, commuting, and daily personal use
No other HS chapter more accurately reflects the essential character or intended use of the product.

5. Conclusion :

The modular anti-theft travel backpack is a non-perishable consumer retail product that is suitable for export. The construction, materials, and intended use of the Subject Goods squarely fit within HS Chapter 42. Further, the chosen US HTS and EU TARIC classifications were reached on a reasoned application of the HS rules and detailed product description and therefore demonstrate appropriate due diligence.
